PROFILE SUMMARY

List the programming languages and frameworks you're proficient in, such as JavaScript, Python, React, Node.js, and SQL. Describe notable projects you've worked on, including the technologies you used and the impact of your work. For example, you might mention how you improved a website's bounce rate or increased a mobile app's performance. EDUCATION

- 2018 - 2021
GUJARAT UNIVERSITY
 - Bachelor of Science with Chemistry
 - CGPA: 6.9 / 10
- 2017 - 2018
NAVYUG VIDHALAY
 - Science with Group-A

SKILLS

- HTML
- CSS
- JAVA SCRIPT
- BOOTSTRAP
- REACT JS
- NODE JS

LANGUAGES

- English
- Hindi
- Gujarati

WORK EXPERIENCE

Meesho Clone Live

- Overall, this Navbar component provides a functional and visually appealing navigation bar with search capabilities, linking to different parts of a web application. It uses state management to handle data and user input effectively while ensuring a good user experience.
- The Section component provides a visually appealing promotional section for a shopping application. It highlights key features of the service (like free delivery and easy returns) alongside a prominent call-to-action button that encourages users to download the app. The use of Bootstrap classes facilitates responsive design and styling, ensuring the layout looks good across different screen sizes.
- The Cart component provides a functional and interactive shopping cart interface. It allows users to view items, adjust quantities, remove items, and proceed to checkout. The use of Redux for state management ensures that cart data is managed globally across the application, while React Router facilitates navigation between different parts of the application. The component is styled using Bootstrap classes for a responsive design.

JavaScript Project Live

- This code is well-organized for a beauty e-commerce webpage, providing clear navigation, product highlights, and an engaging user experience with image carousels and a detailed footer.ADD TO CART button has a custom background color, rounded corners, and a hover effect.
- Features are organized into a responsive grid, ensuring proper alignment and spacing.Bootstrap is used for styling and responsiveness, eliminating the need for custom CSS.Images and concise text descriptions enhance user engagement.
- Sensitive information like card details should not be handled directly on a front-end form. It's essential to implement secure payment gateways.You can enhance the JavaScript validation by checking for the correct email format or ensuring the card number and CVV meet certain patterns.
